FEATURES:

- 4" Thick modular panels
- High R-value insulation
- Efficient refrigeration systems
- Large doors for forklifts available
- Over 20 metal colors optional

APPLICATIONS

Brew Cave® Walk-in and Display Cooler - Walk-in or display coolers to keep your beer cold and accessible. Shelving is available to organize your stock.

Brewing Enclosures - Custom environmentally controlled enclosures that can be used to facilitate manufacturing or brewing processes.

Growler Stations - Keep kegs cool so your customers can take home growlers of their favorite beer varieties.

Ingredient Storage - Store all your perishable brewing ingredients in a walk-in cooler.

Tap Rooms - Store dozens of kegs in a remote walk-in or under-counter cooler to supply your tap room with freshly brewed beer.

Warehouse - Store large quantities of kegs, cans, cases, or bottles before shipment in a controlled environment. Tall ceilings and large doors are available.

Whether you need to store ingredients, supply your tap room, or chill kegs and cases for shipment, Brew Cave® will deliver. We design custom walk-in coolers of all shapes and sizes to conform to your brewery's layout and storage needs.

CUSTOM CONFIGURATIONS

No matter how large or small the project, let us know your requirements and Brew Cave® will build the modular refrigerated building to suit your needs.
